

COVINGS, XPS

Productdata:

Item N°:	as per price list
EAN-Code:	as per price list
Size:	as per price list
Unit:	as per price list

Use and advantages:

For the individual decoration of walls and ceilings in living or commercial areas

- wide range of decorative covings in different dimensions and designs (white)
- easy to process with a fine saw, a mitre box and fast glueing with DECOSA® universal glue
- effective coverage of small decorating deficiencies on edges between wall and ceiling
- can be painted and designed in various techniques with solvent-free dispersion colour
- also suitable for damp locations

Technical Data:

Material:	Polystyrene, XPS
Thickness of material:	depending on the decor
Resistance of temperature:	up to +75°C

The XPS covings are recyclable.

Application:

The underground has to be clean, dry, solid, smooth and able to take a weight.

Before fixing the covings use a mitre-box and a fine saw to cut its corners.

Apply some DECOSA® universal glue on the backside of the coving and press it carefully against the wall and ceiling. Remove traces of glue immediately with a damp sponge. Cover joints with glue or spackle. Covings can be painted with solvent-free dispersion colour.

Glue consumption: approx. 30 g/m.
